CHARLOTTE ELEMENTARY STEM FAIR

This spring students from Washington Elementary, Parkview Elementary, and Charlotte Upper Elementary participated in the Charlotte Elementary STEM Fair. Students displayed their passion for Science, Technology, Engineering, and Mathematics in a gallery walk style fair. Families participated in learning by enjoying several interactive STEM stations and viewing the sixth grade projects. In addition to all the great presentations, students and parents were able to enjoy MSU's portable star dome! Thank you to all the students and parents for coming to the Charlotte Elementary STEM Fair.
